OVERVIEW
The 6th Annual Pediatric Endocrinology Symposium will provide a broad spectrum of interesting and challenging topics on growth hormone. The most current research findings and practice strategies will be presented by an international faculty who are expert in the field. The format will consist of didactic lectures and interactive discussion.

LEARNING OBJECTIVES
At the end of this Symposium, learners should be able to:
• Discuss the most recent research findings and scientific advances in the assessment and treatment of complex endocrine disorders.
• Discuss the most recent advances in molecular regulation of sexual differentiation in males and females.
• Assess and discuss the new Global Consensus Meeting guidelines for the care of young girls and women with Turner Syndrome.
• Discuss the contemporary evaluation and care of boys and teenagers with Klinefelter Syndrome.
LEARNING OBJECTIVES Continued

• Recognize Laron Syndrome and our current understanding of its etiology as first recognized by researchers.
• Recognize McCune Albright Syndrome and assess contemporary treatment methods.
• Recognize Pediatric Bone Disease and apply and treatment guidelines based on evidence

TARGET AUDIENCE
