**2ND ANNUAL NYU WINTHROP HOSPITAL**

# **BREAST HEALTH SYMPOSIUM**

## **OVERVIEW**

Breast health encompasses multiple specialties and programs, including but not limited to: genetics, radiology, pathology, breast surgery, plastic surgery, medical and radiation oncology, navigation, social work, palliative care and survivorship programs. The amount of information published each year on breast health, benign and malignant, is staggering and staying current can be challenging. This course offers a gathering of clinical experts who will emphasize a multi-specialty team-based approach to translating scientific knowledge into practice. Planners of this course hope the attendees will engage the faculty with thoughtful questions, and leave with expanded knowledge and improved competence that will encourage changes in performance to improve care outcomes for their patients.

## **LEARNING OBJECTIVES**

At the end of this course, participants should be able to:

- Review the current management and treatment options for young breast cancer patients
- Review of literature on benign and malignant breast disease from 2016
- Review expert advice on the importance of mammography
- Apply current medical literature to the evaluation and treatment of Ductal Carcinoma In Situ (DCIS)
- Review the current implications for genetic testing in breast cancer
- Apply the current medical literature on management of Inflammatory Breast Cancer

## **COMPETENCIES ADDRESSED**

- Patient Care
- Medical Knowledge
- Practice-based learning and improvement

## **TARGET AUDIENCE**

Medical, Surgical, & Radiation Oncologists, Breast Surgeons, Plastic Surgeons, Radiologists, Pathologists, Genetic Counselors, Physician Assistants, Advanced Practice Nurses, Registered Nurses, Social Workers, Breast Nurse Navigators, Breast Social Workers, Patient Ambassadors and Patient Advocates.
